

INACTIVATION OF TRANSACTION CODES (TC) 417 AND 419

To simplify the process of transferring withholding taxes to the Department of Treasury, users should use TC407 and TC408 with appropriate revenue objects. The transfer should be done in user class 33 with a document type GQ. This new process will replace the use of TC417 and TC419, which will be inactivated on Monday, August 5, and will no longer be available for use.
